

Sedimclean™

Sedimclean Domestic Water Tank Cleaning Machine Features

1. Works in water filled tank.
2. Water consumption continuity during tank cleaning.
3. Tank Sediment cleaning without water wastage.
4. Tank Cleaning without inside tank entry.
5. Works without use of harmful chemicals.
6. Easy to operate with self service design.
7. Tank Cleaning within few minutes.
8. Very low power consumption.
9. User friendly, even ladies can operate.
10. Compact and light weight design.
11. Silent clean and comfortable application.
12. Machine suitable for cleaning 500 to 2000 litres water storage tanks.
13. Design Registered and patent applied.

Specification Sedimclean domestic model

1. Application: - Sediment deposition cleaning in domestic water storage tank
2. Power Supply: - 230 V AC 50 Hz
3. Power Consumption: - 50 W Approximate
4. Cable Length : - 4 meters Approximate
5. Filter Media Rating: - 5 microns
6. Filtration area: - 690 square cm
7. Filter Media: - PP Nonwoven Filter Cloth
8. Continuous usage time: - Maximum 1 hour
9. Empty weight of unit: - 2.4 Kg Approximate.
10. Water filled weight of unit: - 4.2 Kg Approximate.
11. Suitable for water tank depth: - 600 mm to 1800 mm maximum
12. Suitable for Water Tank Capacity: - 500 Litres to 2000 Litres
13. Materials of Construction: - Poly Propylene & Other Plastics
