NEW

Technical Specifications

Material	ABS Plastic
Weight	100g
Capacity	100 Liter
Pressure	0.2 MPa
Temperature	5 - 35°C
Flow Rate	1.5 L/min
Filter Life	3 Months
Filter Size	10 x 10 cm
Filter Type	PP, Activated Carbon, Mesh
Filter Color	White
Filter Shape	Cylinder
Filter Diameter	10 cm
Filter Height	10 cm

Sedimclean™

NEW Sedimclean™
Ceramic Water Filter Cleaning Machine

Product Features

- No need to empty the water for cleaning
- No Water Filter Replacement During Cleaning
- No Wastage of Water
- No need to use Filter Wafers
- No Chemicals & Contaminants
- Easy to Operate with Self Service Design
- Tank (Storage) with Easy Manual
- Two-Look Filter Replacement
- Compact and Light Weight Design
- Simple operation
- Proven quality
- Durable Engineering

Sedimclean Domestic Model

Technical Specifications

- Application :- Sediment deposition cleaning in domestic water storage tank
- Power Supply :- 230 V AC 50 Hz
- Power Consumption:- 50 W Approximate
- Cable Length :- 4 meters Approximate
- Filter Media Specification :- 5 microns x 690 square cm area
- Filter Media Material:- Nonwoven Filter Cloth
- Empty weight of unit :- 2.6 Kg Approximate.
- Water filled weight of unit :- 3.6 Kg Approximate.
- Suitable for water tank depth :- 600 mm to 1800 mm maximum
- Suitable for Water Tank Capacity :- 200 Liters to 2000 Liters
- Materials of Construction: - Poly Propylene, PVC, Neoprene and SS
